123 were Families with Minor Children totalling 433 Individuals

210 were Singles

### General Info about Hope for a New Beginning In A Safe And Healing Place

HOPE (Helping Our People Excel) for a New Beginning is primarily an Emergency Shelter with both an Emergency/Transitional component program operated by Waianae Community Outreach. Our program provides case management services to the houseless/homeless population. This includes families with minor children, couples and single adults without children that are houseless/homeless. In recognition that this program offers temporary shelter services only, the member(s) will maintain a savings account and plan to address the transitional barriers to securing housing.

The **Emergency Program** DOES NOT require Participants to pay monthly program fees. However, the Member(s) will be required to actively participate in a Service Plan that is developed by the Member(s) and their program manager. Earning "Village Bucks" and redeem for fees during this phase of the program. The stay will solely rely on the active participation of the Participants' with their Service Plan that recognize and prioritize the need to become self sufficient and their compliance with House Rules and Program Agreement(s). The length of stay includes 6 months for Emergency services, depending on the Participant's progress, needs and the recommendation of the Program Management to the Executive Team.

The **Transitional Program** WILL require Member(s) to pay monthly program fees. The fees will be assessed based on unit and size of the family. The program manager and the Member(s) will continue to work with and modify the Service Plan that was developed while in the Emergency Program. The length of stay includes no more than 18 months for Transitional services, depending solely on the active participation of the Participants' with their Service Plan, House Rules and other agreements that recognize and prioritize the need to secure permanent housing and maintain self-sufficiency.

Ph: (808) 682-HOPE (4673)  
Fax: (808) 682-4670

**Why:** Every human being deserves the opportunity to build self-sufficiency and a healthy family. It is demonstrated that people fail because a failing system exists. High rents, cost of medical and medicine, childcare are just some of the problems that cause concern. Decades have past, services have been created to focus on temporary fixes rather than resolving the problems, i.e. emergency / transitional services rather than the development of low-cost "affordable" housing that will meet the needs of the individual and family. However there has been movement in the right direction, we need to continue this journey and make every attempt and assurance this direction is pursued. Our part of this journey is to not fail the relationship and trust of those in

need. We offer services at a fee that is met with a "Village Buck" system. This system is created to provide a hand-up rather than a handout. The focus is to accept nothing is free, there is a cost for everything, whether in time, talent and/or treasures. Someone is paying for the donation of food, clothing, household items, medical supplies and care, and housing.

**How:** Using the networking and strengths model approach, individuals and families are assessed as to the barriers in securing and sustaining housing. This includes the cycle called LORD (Living Our Responsibilities Day).

Each individual and family is offered skills that will develop an awareness of the LORD. Cycles of topics to include:

- a. Health: physical, mental and spiritual
- b. Relationship: self-development, parenting and partnering
- c. Education: basic and formal skills
- d. Finances: money and debt management
- e. Employment: micro-enterprises and trade
- f. Housing: supportive and independent

**Departments include:**

**Outreach: (Homeless Outreach)**

Providing an intake and assessment for houseless/homeless services to individuals and families living on the beach, park, street, abandon buildings and vehicles. Regular visits are set up weekly, breaking up the coast into 3 parts, Kaena Pt. to Sewers (Lualualei I), Maili to Kahe Pt and Barber's Pt area.

**Shelter: (Stipend Program)**

Providing Emergency/Transitional Shelter program services to unsheltered families and individuals that desire a need for stability in order to focus on activities that will address their direct barriers to housing. Preference for placement into the shelter program is people who currently reside on the Waianae Coast beaches; this can include beaches in Barber's Pt.

Thank you again for this opportunity to share what we do and who we are. We invite you to come and visit us at the administration office or at Hope for a New Beginning, in a safe and healing place at Onelau'ena in Kalaeloa. If you have any questions, give us a call.
